

PIM's Training on Demand  
**Red Cross CPR & First Aid Certification**

**Train your employees to save lives!**

If an accident occurred, could your employees receive medical attention within 4 to 5 minutes? If emergency services are not close, employees need to learn methods and techniques to sustain life until medical personnel arrives.

Kris Davis is certified by the American Red Cross to teach and certify your employees in CPR/First Aid/Blood Borne Pathogens. Kris has coordinated and facilitated training programs to help develop your skilled employees. Kris can travel to your company or provide training at your facility. (If outside the metro there will be an additional charge for mileage/expenses)
