

Big or small, member companies are accessing PIM resources to assist in all areas of environmental responsibility and safety.

Flaire, Minneapolis

We have been a proud member of The Minnesota Great Printer Environmental Initiative since its inception back in 1997, as a charter member it has proved to be an invaluable resource as we have been visited by OSHA twice along with the Minneapolis Fire Department yearly, which is always interesting. The Minnesota Great Printer certification keeps us up-to-date and in compliance with all of the ever-changing laws. We also receive our Right to Know training through PIM, and Paul is very competent and knowledgeable. If you have been thinking about the program, I highly recommend your participation, it has also helped us gain some business.

J-C Press, Owatonna

J-C Press has utilized PIM's Environmental Services since its inception. Being part of this project naturally led us into the Great Printer program.

During our annual audit our records are reviewed as our processes for handling of hazardous waste and our safety training. Our entire site is inspected by the Environmental Service rep, and areas of concern are noted for us to correct. An OSHA inspection is not a visit we would request, but we feel we would do well if it occurred because of the infrastructure of the Great Printer certification has put into place here. Thanks to PIM for the services you offer us!

GLS Companies, Brooklyn Park

Our participation in the PIM Great Printer program has helped us in making the responsible business decisions that will have a positive impact on our environment, led to improved efficiencies, reduced waste and significant cost savings, as well as higher levels of service to our customers. PIM Environmental Services Corporation services are utilized at GLS Companies with providing Environmental, Health & Safety (EHS) compliance oversight including an annual EHS audit, OSHA-required training, and "check-up" visits designed to provide an ongoing EHS compliance presence on site. PIM manages all critical compliance areas either directly or through coordination with on-site GLS personnel. PIM EHS also provides additional support of our operations such as research or program development if needed.

GLS Companies is the recipient, since 1997, of the Printing Industry of MN Great Printer Environmental Initiative Award. As an ISO 9001:2008 certified company we instituted an ISO Quality Objective of reducing Non-Conforming Product (NCP) to a given percentage of Sales. This has allowed us to realize improved efficiency, cost savings, reduce waste, and decrease our regulatory compliance burden. Root cause data is gathered, analyzed and compared to department and company goals to determine continuous improvement opportunities gained.
